

Atlas Concorde

Circular production backed by measurable resource recovery

Atlas Concorde publishes clear factory-level measures covering circularity, water recovery, packaging and energy efficiency, supported by product and management certifications.

100%

production product scrap reused

100%

process water reused

90%

waste diverted from disposal

WHY THIS MATTERS FOR PROJECTS

- Cooked and raw production waste is recovered and returned to productive use.
- Product packaging is described as fully recyclable and made with 80% recycled cardboard and plastic.
- Heat from industrial kilns is recovered within production processes, alongside renewable generation and efficient lighting.

PROJECT EVIDENCE AND QUALIFICATION

- ISO 17889-1 sustainable ceramic tile certification.
- EcoVadis Silver 2025 and SMETA 4-Pillar audit.
- Collection-specific declarations should be checked for each specification.

Important: Environmental performance, recycled content and certification coverage can vary by collection, format, finish, production site and declaration period. Obtain the current manufacturer documentation for the exact product before relying on a claim.
