

Colorker

Environmental management with verified product disclosure

Colorker combines an environmental management plan with EPD-based product disclosure and continuing investment in energy-efficient ceramic production.

EPD

DAPconstrucción lifecycle disclosure

ISO 50001

energy management certified in 2025

ISO 14025

environmental declaration framework

WHY THIS MATTERS FOR PROJECTS

- The DAPconstrucción programme reports product impacts using European EPD standards.
- Colorker's plan focuses on efficient natural-resource use and minimising production waste.
- Recent dryer-control upgrades are designed to optimise moisture, temperature and associated energy use.

PROJECT EVIDENCE AND QUALIFICATION

- Use the EPD covering the correct ceramic product group.
- ISO 50001 relates to the energy-management system rather than an individual tile.
- Confirm declaration issue date, validity and production-site coverage before tender.

Important: Environmental performance, recycled content and certification coverage can vary by collection, format, finish, production site and declaration period. Obtain the current manufacturer documentation for the exact product before relying on a claim.
