

Ceramica Fioranese

Certified environmental management across Italian production

Fioranese links durable porcelain design with certified environmental management, resource recycling and continuing reductions in energy use and emissions.

ISO 14001

environmental management

EMAS

verified environmental reporting

USGBC

member supporting green building

WHY THIS MATTERS FOR PROJECTS

- Fioranese states that its Italian porcelain production sites are ISO 14001 and EMAS certified.
- Production is designed to maximise resource recycling while reducing energy demand and emissions.
- Raw materials are sourced from certified and controlled quarries, with no harmful substances used in the collections described.

PROJECT EVIDENCE AND QUALIFICATION

- Process certifications support factory-level environmental management.
- LEED contribution depends on the exact project, product and documentation supplied.
- Confirm current certificates and product declarations at specification stage.

Important: Environmental performance, recycled content and certification coverage can vary by collection, format, finish, production site and declaration period. Obtain the current manufacturer documentation for the exact product before relying on a claim.
