

SIL Ceramiche

Made in Sassuolo porcelain designed for long service life

SIL Ceramiche presents a Made in Sassuolo porcelain offer supported by industrial partners using increasingly green and resource-conscious production processes.

ITALY

Made in Sassuolo production

GREEN

technology-led industrial partners

DURABLE

porcelain surface performance

WHY THIS MATTERS FOR PROJECTS

- Porcelain stoneware combines high durability with straightforward cleaning and maintenance.
- Long service life can reduce material replacement cycles in residential and commercial settings.
- SIL states that its industrial partners adopt newer, more eco-sustainable production processes.

PROJECT EVIDENCE AND QUALIFICATION

- Request the current technical and environmental pack for the exact product.
- Confirm manufacturing site, recycled content and any EPD coverage before specification.
- Treat company-level statements separately from collection-level certification.

Important: Environmental performance, recycled content and certification coverage can vary by collection, format, finish, production site and declaration period. Obtain the current manufacturer documentation for the exact product before relying on a claim.
