

VIVES

High recycled content supported by established environmental declarations

VIVES combines certified environmental management and EPD disclosure with targeted innovation in recycled ceramic content.

99%

waste recovered as resources

UP TO 88%

recycled content in selected models

EPD

verified lifecycle disclosure

WHY THIS MATTERS FOR PROJECTS

- VIVES reports that almost 99% of facility waste is recovered through authorised managers.
- Selected YURI NT models reach up to 88% recycled content; 90Tile products are designed around very high recycled content.
- Global EPD declarations are available for porcelain tiles and ceramic wall tiles.

PROJECT EVIDENCE AND QUALIFICATION

- ISO 14001 environmental-management certification.
- Recycled-content percentages vary by product and must be verified for the specified model.
- Confirm the current EPD version and exact product-group coverage before tender.

Important: Environmental performance, recycled content and certification coverage can vary by collection, format, finish, production site and declaration period. Obtain the current manufacturer documentation for the exact product before relying on a claim.
