

WOW Design

Small-format design supported by lifecycle transparency

WOW Design's environmental documentation gives project teams a structured basis for reviewing lifecycle impacts alongside the brand's design-led ceramic collections.

EPD

lifecycle impact disclosure

LCA

evidence-led assessment method

PROJECT

collection data to be verified

WHY THIS MATTERS FOR PROJECTS

- Environmental Product Declaration information supports evidence-led material comparison.
- Durable ceramic surfaces offer long service life, low routine maintenance and design flexibility.
- Small-format modular systems can support repair or selective replacement without renewing an entire surface.

PROJECT EVIDENCE AND QUALIFICATION

- Request the current EPD and technical declaration for the exact collection.
- Confirm manufacturing site, product group and declaration validity at specification stage.
- Use the manufacturer's installation guidance to maximise service life.

Important: Environmental performance, recycled content and certification coverage can vary by collection, format, finish, production site and declaration period. Obtain the current manufacturer documentation for the exact product before relying on a claim.
